

Math 101 Collected Handouts

Spring 2010, WSU Tri-Cities

Rik Littlefield, Instructor

Introductory Material

Syllabus.....	2
Things We Will Study	5
Consumer Loans and Math 101 Course Content	7

Reference Material

“Cheat Sheet” for Algebra	9
“Cheat Sheet” #2 for Algebra: Powers, Roots, and Logarithms	11
Algebra Mistakes: How to Make Them, How to Find Them!	12
Functional Relationships Commonly Found in Data Graphics, Modeling, and Fitting.....	14

Lecture Notes

Introduction to Algebra: The First Week.....	18
Some Commonly Used Visual Notations In Arithmetic.....	24
Introduction to Variables	25
Introduction to Equations.....	27
Cancelling in Algebraic Fractions	31
Algebra — The Numbers Game	33
Why Are Story Problems So Hard?	35
Ratios, Proportions, Unit Conversions, and the Factor-Label Method	37
Using Tables to Solve Mixture Problems	45
Strategies for Solving Mixture Problems.....	49
Solving Systems of Linear Equations by Elimination	51
Solving Exponential Equations.....	52
Exponential Improvement of Memory Density	56

Excel For Algebra

Lesson 1: Basic Concepts and “Button-ology”	57
Lesson 2: Checking Algebra By Plugging In Numbers.....	63
Lesson 3: Consumer Loan Simulation	73
Lesson 4: More About Goal Seek.....	79
Lesson 5: The Solver	87
Lesson 6: Basic Graphing	99
Lesson 7: Curve Fitting with the Solver	105
Conversion Notes: Excel 2007 vs Excel 2003.....	111
Conversion Notes: Excel 2007 vs OpenOffice Calc.....	122

Homework Assignments

Arithmetic in Visual Notation and Single-Line Notation	123
Solving Equations (First Set).....	125
Solving Equations (Second Set, With Spreadsheet Checks).....	126
Ratio Proportion Problems.....	127
Consumer Loan Spreadsheet.....	128
Solving Mixture Problems By Goal Seek.....	129
Solving Simultaneous Equations By Elimination.....	130
Graphing, Interpreting Curves and Trendlines	131
Powers and Roots.....	132
Solving Exponential Equations.....	133
